DETAILED ACTION

Allowable Subject Matter

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose the claimed invention particularly characterized by a p channel transistor comprising a liquid electrolyte and a diamond surface that serves as a channel comprising a mixture of hydrogen terminals, oxygen terminals and amino terminals.

The claimed invention is advantageously configured, for example, as a sensor detecting pH increase (e.g. claim 2) and increase in urea concentration (e.g. claim 4).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 4,968,400 is disclosed for citing prior art ISFET technology, but fails to teach, for example, "a diamond surface that serves as a channel comprising a mixture of hydrogen terminals, oxygen terminals and amino terminals."
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evan Pert whose telephone number is 571-272-1969. The examiner can normally be reached on M-F (7:30AM-3:30 PM).
